

Why Thermal Printing vs. Laser Printing

There are several reasons to select thermal over laser printing ranging from simple hardware design to low ownership costs. Thermal printing is the most reliable label printing technology.

Highlights

- Compact footprint that fits easily into many small work spaces.
- Laser printer programming language compatibility for easy integration into legacy systems.
- High-speed and high-quality script printing
- No adhesive ooze and costly maintenance.
- Quiet operation
- Energy efficient printing saves money and reduces waste.
- Network-ready and ready to support input devices such as scanners, keyboards, and numeric keypads.

The CRx thermal label printer is the right price, right size, and right performance to address the healthcare market!

CRx Script Label Printer

Optimize cost and performance for your Pharmacy Printing workflow!

The CRx printing solution offers pharmacies the ability to save time and costs associated with their prescription fulfillment process.

The CRx printer generates prescription labels fast and saves money on energy and supplies.

Because the CRx is a thermal printer, no messy or expensive toner is required and it utilizes far less energy than a laser printer.
